Well done lads ☺

Accidents - In the unfortunate event that you are involved in an accident/incident, can you please if safe to do so take photos of the location and any damages sustained.

A photo tells a thousand stories - so they say

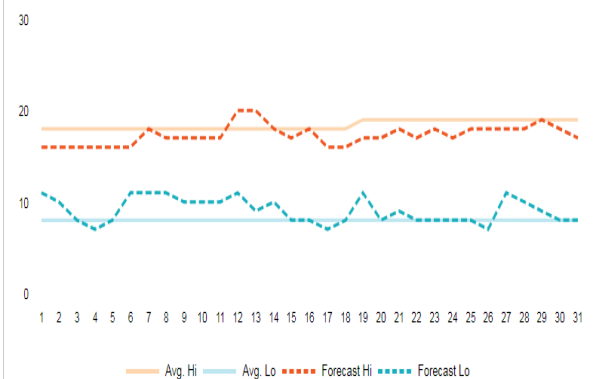

Safety Share - Your Eyes - Most people know their eyesight is precious, but the most common places for accidents to happen is home and work. Sometimes we forget about the importance of protecting our eyes and perform work that can place them at risk from a splash, spark, flash or contact from a moving object.

We can protect them simply by, apply glasses, and wearing a face shield. Use them or lose them – it's your choice
