Oops – what's gone wrong?

Near Miss - Distraction: One of our sub-contractors was travelling from one CBH site to another when he was making some adjustments to the in-vehicle tablet during travel. The driver took his eyes off the road and in doing so failed to identify that there was a vehicle coming towards him in the opposite direction. The truck driver was focused on the tablet and did not know that he was on the wrong side of the road and caused the LV to take immediate action and leave the road onto the gravel to avoid a head on collision. *Distraction can be a killer!! Remain focused on the road you are travelling on.*

Property Damage: A sub-contractor was reversing into a large shed that was filled with product and other equipment. The driver reversed the trailers back into position at a tight angle and into the corner of the shed. The driver raised up the trailer to a height that caused contact with the overhead roof structure. Damages were sustained to the tarp pole that required removal and replacement of the tarp and modifications to the tarp pole. *Always check the roof height, if in doubt use a SPOTTER.*

Slip/Trip/Fall: One of our sub-contractors was at a CBH site and was unable to roll his tarp over his load. The driver made the decision to access the front ladder of his dog trailer to try to roll the tarp over from the front of the trailer. As the driver was performing this he released his hand on the trailer and lost his footing resulting in a fall from ladder to ground. The driver suffered injuries that required hospital treatment and ongoing medical reviews. An ICAM investigation is scheduled to be completed by all parties and additional information will be shared with all how we can ensure this does not happen to others.
