iPhone Emergency Information

Did you know that iPhone users running IOS 8 or higher can add emergency information that is accessible to anyone despite the phone being locked? This could be vital in the event of an accident.

To set it up go to the new "Health" app on your home screen. (white tile with a red heart on it)

On the bottom right of the screen tap on "Medical ID". It will show you the current data, to update the information tap "edit" at the top right of the screen.

When editing make sure you have the slide bar "Show When Locked" turned on. This allows people to access this information from your lock screen without having to unlock your phone!

You should also remember this if you ever have to assist someone that has been badly injured. Check their iPhone! When it comes up asking for a passcode, tap "Emergency" on the bottom left of the screen, then tap "Medical ID" also on the bottom left of the screen and you will have access to that persons vital medical information. Try setting it up on your phone, it could save your life.

NEWS AT MILNES WELSHPOOL

Marley's together with the cooperation of Milnes have installed Diesel and Adblue tanks at the Welshpool site.

To access this facility you will need a Marley's padlock key.

All drivers must first read and sign the procedures and emergency information contained on the blue clipboard at the tanks.

All fuel must be recorded on your time card.

Although the tanks are covered by CCTV please ensure you lock them correctly after use.

The ablation facilities at sheep cube alley are also being decommissioned ASAP. Driver will be able to access the toilet facilities on the ground floor of the main office building between 6am - 6pm. Outside of these hours they will need to be let in.

Fault Report Cards

All drivers are reminded that Fault Report Cards MUST be completed AND handed in with your paperwork for ALL faults.

Please ensure you include the EQUIPMENT ID, THE DATE, YOUR NAME and SIGN. In other words ensure you complete ALL of the fields fully!!!

MAINTENANCE NOTICE BOARD

Drivers please be aware of and remember to check the white board located on top of the diesel pump at the Hope Valley yard. It will indicate which trucks are due for maintenance that night. Please go and see Greg or Byron or park in bays A or B ready to enter the workshop. **DO NOT** park in the lineup. Thank you

We pride ourselves on providing a reliable and efficient transport service to our customers.

CBH Corner

PPE—Drivers are again reminded that a high visibility shirt with long sleeves rolled down must be worn at all times while on CBH sites.

Starting Monday 17/08/15 CBH Kwinana will be undergoing some major construction works lasting for around 18 months. During this time it will be treated as a construction site and as such all personnel will be required to wear safety glasses and a hard hat. Please see Eryn if you require either of these. There will also be some traffic management (traffic lights) and changes to truck parking and flow. New amenities will be located next to the truck line up to help avoid unnecessary interaction with the construction work. You will be given further details upon arrival to site by the marshal. Any problems please contact Marley's Management.

CBH have implemented a new policy that prevents the use of a front end loader or bobcat from being used to catch the excess product being discharged from the bagging chute on a truck or trailer. If a truck is overloaded it must be directed to a location where it can discharge the excess onto the ground or a grid.

Marley's are working with CBH on a trial which will see a truck and driver fitted with small cameras. The driver will then conduct a standard load on the CBH site recording the footage. This footage will then be used for analysis, training and education on what exactly a driver can see while on site in regard to obstacles, people, hand signals, clearances, dust etc.

The same will be done with an RPO on the grid so combined we can each get an understanding of the others difficulties when carrying out their duties.

Together this should make for a safer and more harmonious environment.

Good PR (Public Relations)

All personnel working for Marley's, whether a direct employee or subcontractor, need to be aware of how their conduct may affect the reputation of Marley's Transport.

Driving behavior that could be perceived as being aggressive, rude, dangerous or inattentive is not condoned. As professional drivers your conduct should be the best on the road.

Banter, foul language, abuse or other conversations of a degrading nature are NOT acceptable on open air communications such as UHF radios. Our customers such as farmers and CBH are listening as well as the local school buses containing young kids.

Personal interactions must be of a polite and courteous manor when visiting customers sites such as CBH and farmers as well as local business such as the service station.

You are the face of our company and can have a great effect on the publics perception of the Marley family and the people it employs. Please ensure we are all reflected as good moral citizens.

We pride ourselves on providing a reliable and efficient transport service to our customers.
