Skin Checks – it's as easy as ABC...

How to: Check all spots on your body, from moles to freckles to age spots. Skin cancer can develop anywhere on the skin and is one of the few cancers that you can usually see.

Get into the habit of checking your skin - Ask someone for help when checking your skin, especially in hard to see places. Don't forget to check the sole of your feet and under your nail beds and your scalp. Skin cancers rarely hurt and are much more frequently seen than felt.

Skin cancer warning signs: **ABCDE**

Asymmetry – One part of the mole or birthmark doesn't match the other.

Border – The edges are irregular, ragged, notched or blurred.

Colour – The colour is not the same all over and may include shades of brown or black, sometimes with patches of pink, red, white or blue.

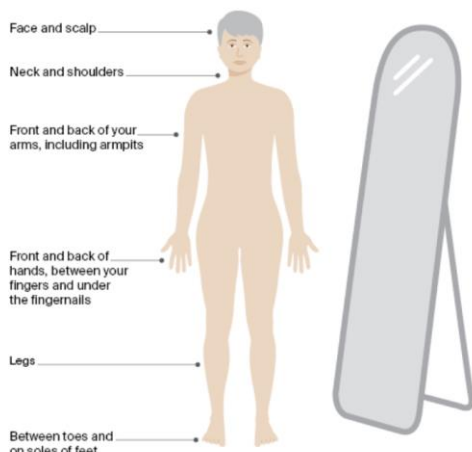

Diameter – The spot is larger than ¼ inch across – some melanomas can sometimes be smaller than this.

Elevation – The mole is changing in size, shape or colour.

Firm – Run your finger over your mole and feel for firmness.

Growing – Regularly take photos of your mole to check for signs of growth and change.

How to check your skin

Speed, Mobile Phone,

Seatbelts Detection

Devices.

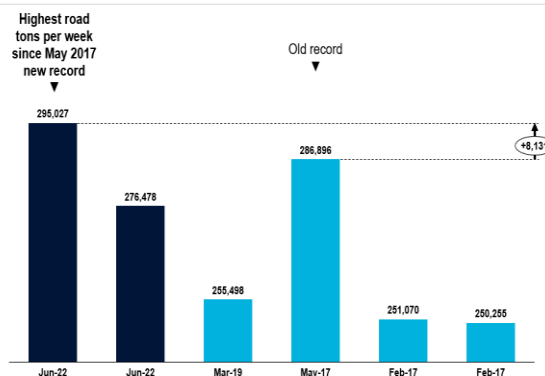

Distraction is a killer; WA Police have notified that they are trialing the implementation of 6 new devices to target the above areas. These will be applied in the metro and regional areas. **WARNING** – If you **speed**, don't wear your **seatbelt** or use your **phone** whilst driving you **ARE** jeopardising your licence, livelihood and placing **YOUR LIFE** and others at **RISK**...

TIME FOR CHANGE

Logistics Milestone | Road Haulage Record Tons Moved

Weekly road tonnage moved to Port.
Historically only six weeks (illustrated above) have ever been above 250kt since 2016. The last two weeks in June (dark blue) have both exceeded 275kt

CBH – Road Haulage All Time Record Broken - During the last 6 years there have only been 6 weeks above 250KT. Two of them occurred consecutively in the last two weeks of June 2022. The highest road tonnage moved over the last 12 years in one week was the record of 286kt set in May of the big harvest of 2017. End of June 2022 that record was **broken** with 295K ton moved one week and the week prior 276kt moved. **Well Done TEAM**

We pride ourselves on providing a reliable and efficient transport service to our customers
